

BRAND ALIGNMENT REPORT

Alignment Summary

The original content was largely on-brand, with a professional and localized tone. However, minor adjustments were made for consistency, adherence to cultural norms, and clarity in messaging. Specific adjustments included removing the phrase 'drowning in data' for a more neutral expression, ensuring that the call to action is direct across all platforms and emphasizing the empowerment of local businesses. Some body texts were refined for brevity and stronger impact. Overall, the changes maintain commercial effectiveness while ensuring cultural appropriateness and compliance with professional standards.

Brand Voice Guidelines

DO: Use professional language that resonates with local audiences; emphasize empowerment and collaboration; maintain a bold and confident tone.

DON'T: Use colloquial language or phrases that may not resonate culturally; avoid negativity; steer clear from vague or generic statements.

Value Proposition

At Thakaa Data Solutions, we provide high-performance BI solutions tailored to empower Saudi businesses, enabling informed decisions through actionable insights and predictive analytics that drive collaboration and growth.

Content Guardrails

- No offensive or discriminatory language.
- No political commentary or geopolitical references.
- Avoid religious endorsements or insensitive references.
- Ensure cultural appropriateness in messaging for Saudi Arabia.
- No unverified statistical claims or misleading data.
- No sexually suggestive, violent or unprofessional content.
