

SAUDI ARABIA GTM STRATEGY

Executive Summary

Thakaa Data Solutions aims to penetrate the rapidly growing Saudi Arabian Business Intelligence (BI) market by offering localized solutions tailored to the unique needs of B2B clients across various sectors. With a projected market growth of 15% CAGR through 2025, aligning our strategy with Vision 2030 initiatives presents a significant opportunity to capture market share among SMEs and larger enterprises. Our dual-product offerings-Core BI Setup and Smart Predictor Module-are designed to meet the critical data management and forecasting needs of Saudi businesses, enhancing their operational efficiency and decision-making capabilities.

ICP Segments

Segment 1: Retail SMEs in KSA

Firmographics: Retail and E-commerce sector, 50-250 employees, revenue: SAR 5M - 50M, local operations across major cities.

Job Titles: IT Manager, Operations Manager, Business Owner

Pain Points:

- Struggles with managing multi-branch sales data efficiently
- Difficulty in forecasting stock demands
- Lack of actionable insights from existing data
- Time-consuming manual reporting processes
- Need to optimize inventory costs

Behavioural Traits: Prefers recommendations through trusted networks (wasta), values localized support, willing to engage in consultative selling environments (majlis).

Value Drivers: Cost efficiency, data-driven decision-making, ease of use, seamless integration with existing systems.

Segment 2: Healthcare providers in KSA

Firmographics: Healthcare sector, 100-500 employees, revenue: SAR 10M - 100M, primarily hospitals and clinics.

Job Titles: Chief Information Officer (CIO), Data Analyst, Operations Director

Pain Points:

- Need for accurate real-time patient data reporting
- Difficulty in managing compliance with SFDA and ZATCA regulations
- Challenges in effectively analyzing healthcare data for improved patient outcomes
- Struggles with inventory management for medical supplies
- Integration challenges with existing ERP systems

Behavioural Traits: Willing to invest in data solutions that ensure compliance, prefers user-friendly technologies, values peer validation for product adoption.

Value Drivers: Patient care improvement, regulatory compliance, operational efficiency, advanced analytics capabilities.

Segment 3: Manufacturing Companies in KSA

Firmographics: Manufacturing sector, 250-1,000 employees, revenue: SAR 50M - 500M, focused on industrial production and supply chain management.

Job Titles: Supply Chain Manager, Business Analyst, Operations Head

Pain Points:

- Inefficient inventory turnover and stock management
- Need for predictive analytics to avoid stockouts
- Lack of data integration along the supply chain
- High operational costs due to inefficient data processes
- Difficulty in generating timely reports for management

Behavioural Traits: Focus on ROI and efficiency in purchases, consultative decision-making processes, responsive to innovative technologies that confer competitive advantages.

Value Drivers: Streamlined operations, reduced costs, enhanced productivity, real-time data insights.

Localised Value Proposition

Thakaa Data Solutions offers tailored Business Intelligence services to Saudi B2B buyers, providing high-performance data pipelines and localized predictive analytics. Our solutions are designed not only to simplify complex data processes but also to integrate seamlessly with local ERP systems, ensuring that businesses can make informed decisions based on real-time insights and forecasts.

Messaging Pillars

- 1. Local Expertise: Our solutions are specifically designed for the unique needs of Saudi businesses.
- 2. Efficiency Gains: Transform your data handling processes to save time and reduce costs.
- 3. Future-Ready Insights: Leverage predictive analytics to stay ahead of market demands.
- 4. Regulatory Compliance: Ensure adherence to ZATCA and SFDA standards effortlessly.
- 5. Empower Decision-Making: Data-driven insights lead to better business outcomes.

Channel Strategy

The marketing strategy will leverage a diversified channel approach to maximize outreach and engagement among target segments. ROI rationale includes:

- LinkedIn (SAR 3,000 | 30%): With a strong B2B focus, LinkedIn will deliver targeted content to decision-makers, increasing brand visibility and lead generation.
- Google Search / Display (SAR 2,000 | 20%): Enhances visibility during critical buying phases, linking prospects directly to actionable insights and service offerings.
- Snapchat Ads (SAR 1,500 | 15%): Engages a younger audience, raising brand awareness among emerging business leaders.
- Instagram / Reels (SAR 1,000 | 10%): Visually showcases our solutions, making complex data concepts easily digestible.
- WhatsApp Business API (SAR 500 | 5%): Facilitates prompt communication with prospects, leveraging growing popularity for business interactions.
- Events / Webinars (SAR 1,000 | 10%): Provides educational opportunities for engagement and showcasing product expertise.
- Content Production (SAR 700 | 7%): Ensures all communication materials are high quality and tailored for the audience.
- Reserve / Testing (SAR 300 | 3%): Allows for flexibility and optimization of campaigns based on real-time performance data.

Budget Breakdown

Channel	Budget Allocation	Percentage	Rationale
LinkedIn	SAR 3,000	30%	Primary B2B platform to engage decision-makers
Google Search / Display	SAR 2,000	20%	Direct access to prospects searching for BI solutions
Snapchat Ads	SAR 1,500	15%	Brand awareness among younger professionals
Instagram / Reels	SAR 1,000	Engaging content format to simplify	
WhatsApp Business API	SAR 500	5%	Quick, responsive communication channel growth
Events / Webinars	SAR 1,000	10%	Direct engagement opportunities to showcase expertise
Content Production	SAR 700	7%	Ensures high-quality materials for all campaigns
Reserve / Testing	SAR 300	3%	Buffers for optimization of ongoing campaigns
Total	SAR 10,000	100%	Strategically allocated to maximize reach and conversion

Scaling Past Marketing Successes

The previous organic educational content campaign on LinkedIn focused on simplifying data warehouse architecture successfully generated 40% of active B2B leads. This tactic can be localized by creating content that emphasizes the specific needs of Saudi businesses, such as compliance with ZATCA and leveraging data for operational efficiency. Additionally, hosting webinars to discuss these specialized topics can further enhance engagement and position Thakaa as a thought leader in the market.

90-Day Execution Roadmap

Month 1: Launch targeted LinkedIn ad campaigns focusing on retail SMEs and healthcare providers. Host a free webinar on 'Data-Driven Decision Making for Retail Businesses' to generate leads.

Month 2: Continue LinkedIn campaigns; initiate Google Display ads with educational content about the Smart Predictor Module. Create and share infographics on Instagram to illustrate customer success stories.

Month 3: Assess and analyze performance metrics from digital campaigns; adjust targeting as needed. Host a roundtable event with industry leaders discussing BI solutions in healthcare. Increase outreach through WhatsApp Business to follow up with leads from Months 1 and 2.

KPIs & Success Metrics

- Generate 200 leads through LinkedIn in the first month.
- Achieve a 4% click-through rate on Google Display Ads by Month 2.
- Increase Instagram engagement rate to 10% through regular story updates and infographics.
- Conduct 3 webinars with at least 100 attendees each by the end of Month 3.
- Move lead conversion rate to 15% from initial campaign engagement.

Risk Mitigation

1. Regulatory Compliance Risks: Collaborate with local legal experts to ensure all marketing practices adhere to ZATCA and SFDA regulations. Conduct regular audits.
2. Cultural Sensitivity Risks: Employ local professionals and consult on marketing materials to remain culturally relevant and sensitive. Leverage existing relationships within the community (wasta).
3. Intense Competition Risks: Differentiate by emphasizing local expertise and superior customer support; consider strategic partnerships with local ERP providers to enhance service offerings and outreach.
